Profile Summary

Final-year Computer Science undergraduate (2026 pass-out) with a strong foundation in programming (C++) and Software Development Life Cycle (SDLC) concepts. Passionate about building scalable, high-performing applications and solving analytical problems through structured and efficient coding practices. Experienced in participating across development phases including design, implementation, testing, and debugging. Demonstrates strong problem-solving ability, stakeholder communication skills, and adaptability to dynamic project environments. Eager to contribute to IBM Consulting by delivering innovative solutions that support hybrid cloud and AI-driven transformations.

Education

Guru Gobind Singh Indraprastha University(HMRITM) <i>Bachelor of Technology in Computer Science</i> – Secured 2nd rank in college with a current CGPA of 9.15 .	New Delhi, India <i>Sep 2022 – Sep 2026</i>
M.M. Public School <i>Class 12th – CBSE</i> – Scored 94.4% with PCM + Computer Science.	New Delhi, India <i>2021</i>
M.M. Public School <i>Class 10th – CBSE</i> – Scored 95% .	New Delhi, India <i>2019</i>

Technical and Soft Skills

- **Data Structures and Algorithms** : DSA in C++(Arrays,String,Sorting,LinkedList,2D-Arrays etc...)
- **Tech Stack**: HTML, CSS, Tailwind, Bootstrap, JavaScript, Node.js, Express.js, REST APIs, MongoDB, React.js, Postman, Hopscotch, PostgreSQL,SQL,OOPS
- **Developer Tools**: VS Code, Git/github
- **Languages**: C, C++,Javascript
- **Soft Skills**: Leadership, Communication, Problem Solving, Teamwork, Critical Thinking, Time Management

Professional Experience

Internship at IIT Delhi -Present Software Developer InternJune 2025 – Dec 2025	Delhi, India <i>2pt</i>
– Built a full-stack Next.js + PostgreSQL platform to digitize IIT Delhi's facility training bookings. – Implemented role-based dashboards (Admin, Lab In-Charge, Faculty, Student) with JWT authentication. – Integrated React Calendar scheduling and advanced filters, reducing booking time and conflicts. – Collaborated with designers to enhance UI/UX and improve booking flow efficiency. – Integrated an interactive calendar-based scheduling system with real-time availability checks and advanced filtering, significantly reducing booking conflicts and turnaround time. – Participated in code reviews, testing, and deployment cycles, following best practices in version control and collaborative software development. – Resolved authentication and authorization bugs (JWT expiration, role leakage, unauthorized access)	
BIS Standard Club HMRITM <i>Deputy Head</i> – Led awareness events on BIS standards, promoting quality and standardization across campus. – Organized workshops and campaigns to educate students on the importance of national standards.	New Delhi, India <i>Aug 2023 – Aug 2024</i>
Commentator, DD Robocon <i>Lead Commentator</i> – Acted as the official commentator for DD Robocon, a national-level robotics competition hosted and managed by IIT Delhi, delivering live coverage to both on-site and broadcast audiences. – Collaborated with event organizers, technical crews, and judges to ensure smooth event flow and accurate information dissemination.	New Delhi, India <i>July 2025</i>

Key Projects

Doctor Booking Appointment App – React.js, MongoDB, Express.js, Node.js – Developed a full-stack appointment booking system enabling users to register, log in, and schedule doctor appointments with real-time updates with Strong UI/UX and enhanced frontend. – Implemented secure JWT authentication and role-based authorization for admins, doctors, and patients. – Validated and sanitized form inputs using validator.js to prevent injection attacks and ensure data integrity.	May 2025
Gemini AI – React, Gemini API, Context API – Built a Google Gemini clone that generates AI responses using Gemini API and React Context API. – Built a fully responsive frontend project	April 2025
Live Code Editor – React.js, CodeMirror – Developed a browser-based live code editor with real-time preview supporting HTML, CSS, and JavaScript. – Optimized performance with efficient state management using useState and useEffect hooks.	May 2025
